

A Two-Days

Workshop

On

**“Web Technologies, PHP & Advance Framework
WORDPRESS & JOOMLA ”**

September 09th & 10th , 2016

Organized By:

**FACULTY OF COMPUTER SCIENCE
Department of Computer Application (MCA)
Sankalchand Patel College of Engineering, Visnagar**

INTRODUCTION

The worldwide demand for PHP development continues to grow. One of the best ways to stand above the competitors is to prove the official credential of PHP competence. And that's not easy at all. The rapid growth of Web based application over the past decade suggest that to succeed in our professional life, along with individual excellence, one needs to have the spirit and ability of working as an effective Web Developer.

WORDPRESS is a free and open-source content management system (CMS) based on PHP and MySQL. WordPress is installed on a web server, which either is part of an Internet hosting service or is a network host itself;

JOOMLA is a free and open-source content management system (CMS) for publishing web content. It is built on a model-view-controller web application framework that can be used independently of the CMS. In this regards **SPCE-M.C.A. Programme** is organizing this Workshop for awareness of new web CMS among the students.

SPEAKER OF DISCOURSE

Mr. Mahipatsinh Rajput
